Overview

Automation-focused AI Engineer with experience building GenAI systems, agentic workflows, and ML-driven tools. Strong foundation in Python, applied machine learning, and intelligent automation.

Skills

AI / GenAI: Agentic AI, Generative AI, Large Language Models (LLMs), LangChain, LangGraph, Retrieval-Augmented Generation (RAG), Prompt Engineering

Machine Learning / Deep Learning: Machine Learning, Deep Learning (CNN, LSTM, Transformers), NLP, Time Series Analysis, Model Training & Evaluation

Libraries & Frameworks: TensorFlow, Keras, scikit-learn, Pandas, NumPy, Matplotlib, Seaborn

Backend & Systems: Python, FastAPI, REST APIs, Automation Architecture, CI/CD

Tools: Git, Jupyter Notebook, VS Code, Postman

Supporting: Selenium WebDriver, Serenity BDD, HTML, CSS, JavaScript (basic), MySQL, MongoDB

Experience

Associate Software Engineer – Automation & AI,
PalTech – Hyderabad

Apr 2025 – Present

- Designed and built **AI-powered automation tools**, including an **agentic AI assistant** to generate and validate UI element locators using prompt engineering and intelligent workflows.
- Applied **LLM-based techniques and early agentic AI patterns** to automate decision-making within automation pipelines.
- Developed and maintained **scalable automation frameworks** integrated with CI/CD pipelines, improving reliability and execution efficiency.
- Explored **LLM evaluation and testing strategies** to improve robustness of AI-driven systems.

Training Software Engineer, PalTech – Hyderabad

Sept 2024 – Mar 2025

- Built a strong foundation in **software engineering and automation systems**, working with Java-based frameworks and CI/CD pipelines.
- Contributed to **internal tools and workflows** aimed at improving system reliability and development efficiency.
- Collaborated with **cross-functional teams** to understand real-world production constraints and end-to-end engineering processes.
- Supported early experimentation with **AI-assisted automation concepts**, gaining exposure to applied AI in engineering environments.

Projects

MYTA – AI Assistant for Marketers & Job Seekers

Agentic AI Platform (In Progress)

- Building an **agentic AI system** that helps users market themselves using AI-driven content generation, refinement, and personalization.
- Designed multi-agent workflows using **LangGraph** and **RAG** to plan tasks, invoke tools, and adapt outputs based on user goals.

AI-Based Element Locator Finder

github.com/SmdZubair0/Web_Inspector

- Built an **AI-powered locator generation tool** that dynamically analyzes the DOM and generates robust XPath/CSS selectors.
- Implemented **agentic workflows** to adapt to UI changes, improving reliability of automation systems.

Stock Price Prediction (Time Series + NLP)

github.com/SmdZubair0/Stock-Price-Prediction

- Built an **LSTM-based time series model** combining historical stock data with news sentiment analysis and evaluated real-world data challenges.

Education

G. Pullaiah College of Engineering and Technology,
B.Tech in Computer Science & Artificial Intelligence

Dec 2021 – May 2025

- Relevant Coursework:** Machine Learning, Deep Learning, Natural Language Processing, Data Structures & Algorithms, Time Series Analysis, Probability & Statistics, Software Engineering
