

Shaik Mohammed Zubair

smohammedzubair0@gmail.com | +91 6281709788 | smdzubair-portfolio.netlify.app/

linkedin.com/in/smdzubair | github.com/SmdZubair0

Skills

Programming: Python, Java, C++

Machine Learning / AI: Regression, Classification, Deep Learning, NLP, Time Series Forecasting, Feature Engineering, Hypothesis Testing

Generative AI & Agents: LangGraph, LangChain, Hugging Face, OpenAI APIs, Generative AI, Agentic AI

Frameworks & Libraries: Scikit-learn, TensorFlow, PyTorch, Hugging Face, Pandas, NumPy, Matplotlib, Seaborn

Tools: Git, Jupyter Notebook, VS Code, Docker, MLflow, Postman, CI/CD, Selenium WebDriver

Frontend: HTML, CSS, JavaScript

Backend: FastAPI, Flask

Databases: MySQL

Experience

Associate Software Engineer, PalTech - Hyderabad

Sept 2024 – Present

- Built an **AI tool using LangGraph** to automatically generate and validate locators for web elements, enhancing automation framework reliability and reducing manual efforts.
- Currently implementing self-healing scripts that dynamically adapt when web elements change, reducing test failures.
- Built an **RAG-based GenAI system** to automate test case generation, reducing manual QA effort
- Designed and maintained a Java-based automation framework (Serenity BDD + Selenium), integrated with CI/CD pipelines.
- Researched and applied Agentic AI workflows for intelligent automation, driving AI adoption in QA processes.

Projects

Stock Price Prediction (LSTM + Sentiment Analysis)

github.com/SmdZubair0/Stock-Price-Prediction

- Built an **LSTM-based model** combining historical stock data with financial news sentiment (FinBERT), achieving high directional accuracy.
- Tools: Python, TensorFlow, LSTMs, FinBERT, Yahoo Finance API, News API, Pandas, NumPy

Chrome Extension for Web Page Querying

github.com/SmdZubair0/ChromeExtension

- Developed a **Chrome extension** with a backend powered by **LangChain + FastAPI**, enabling users to query and summarize any webpage content directly.
- Tech Stack: LangChain, FastAPI, Python, Chrome Extension APIs

Movie Recommendation System (Hybrid)

github.com/SmdZubair0/Movie-Recommendation-System

- Built a hybrid recommendation engine using content + collaborative filtering, improving recommendation accuracy.
- Tools: Python, Scikit-learn, Word2Vec, Nearest Neighbors, Pandas, NumPy

Education

G.Pullaiah College of Engineering and Technology,
B.tech in Computer Science and Artificial Intelligence

December 2021 – May 2025

- **Coursework:** Machine Learning, Deep Learning, NLP, Data Structures & Algorithms, Time Series Analysis, Probability & Statistics, Software Engineering
